Qlik

Cyclic dimension

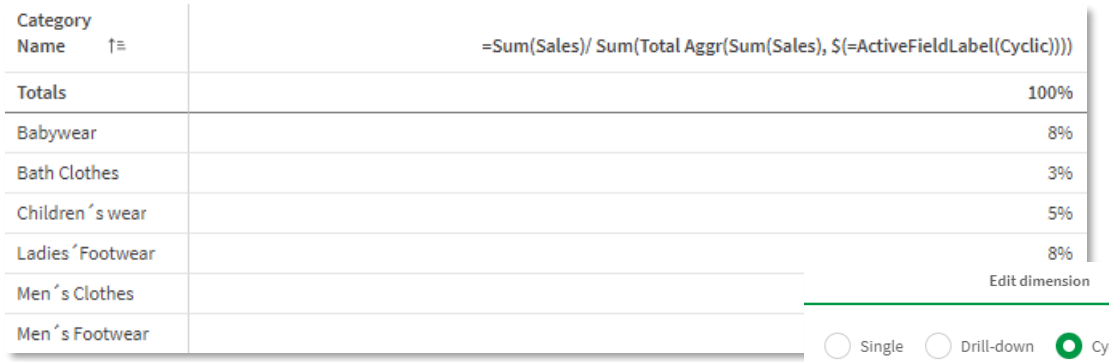
New master dimension type, switch in the whole app

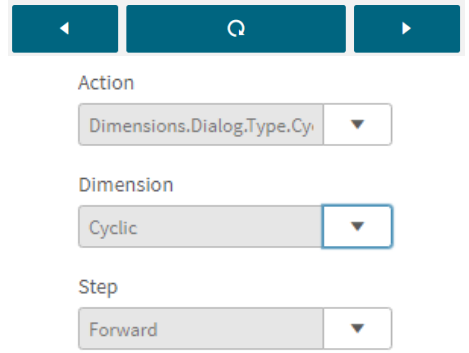
Useful for

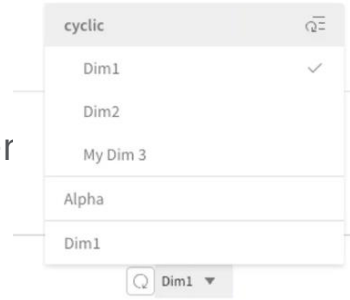
- Collect dimensions in group
- Save space screen estate
- One chart - many use cases

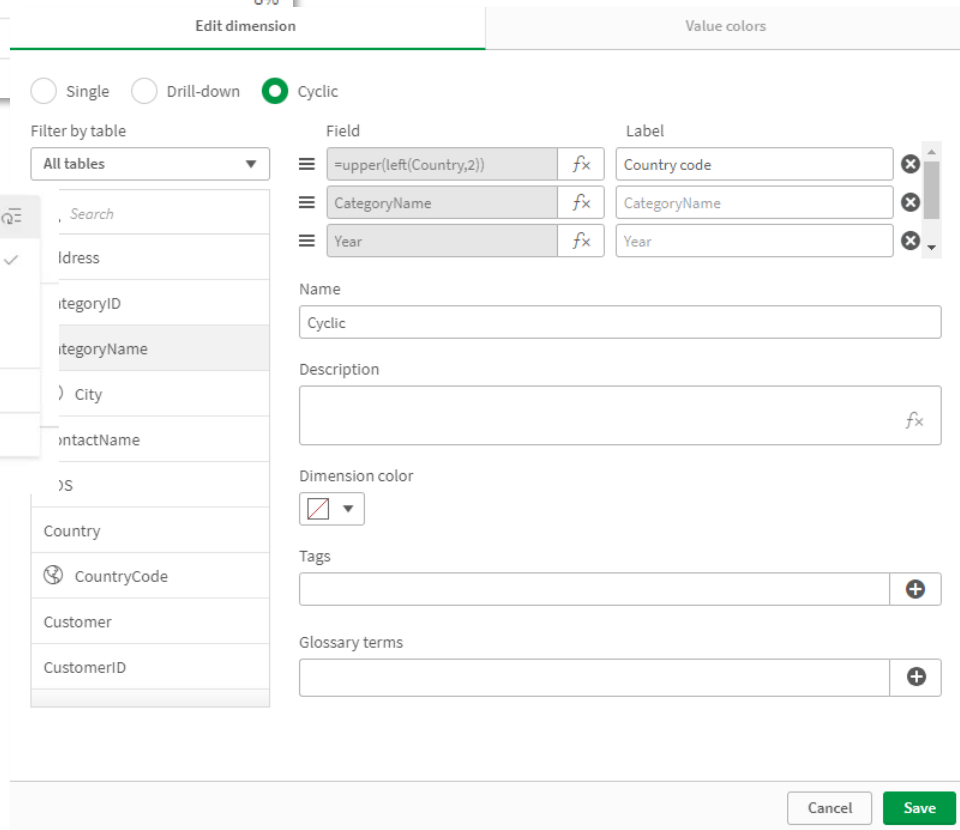
Features

- Button action to toggle field
- Drop down menu on axis
- Set labels on fields inside group, also in drill down
- Engine functions to query group :
  - *GroupDimensionIndex('Cyclic')* returns current field index 1-r
  - *GroupDimensionLabel('Cyclic')* returns current field name.
  - Use for labels or for dimension dependent measures.
- Similar to drill down but without the hierarchy.
- Similar to alternative dimensions but for applies for the whole app.









Button go to chart

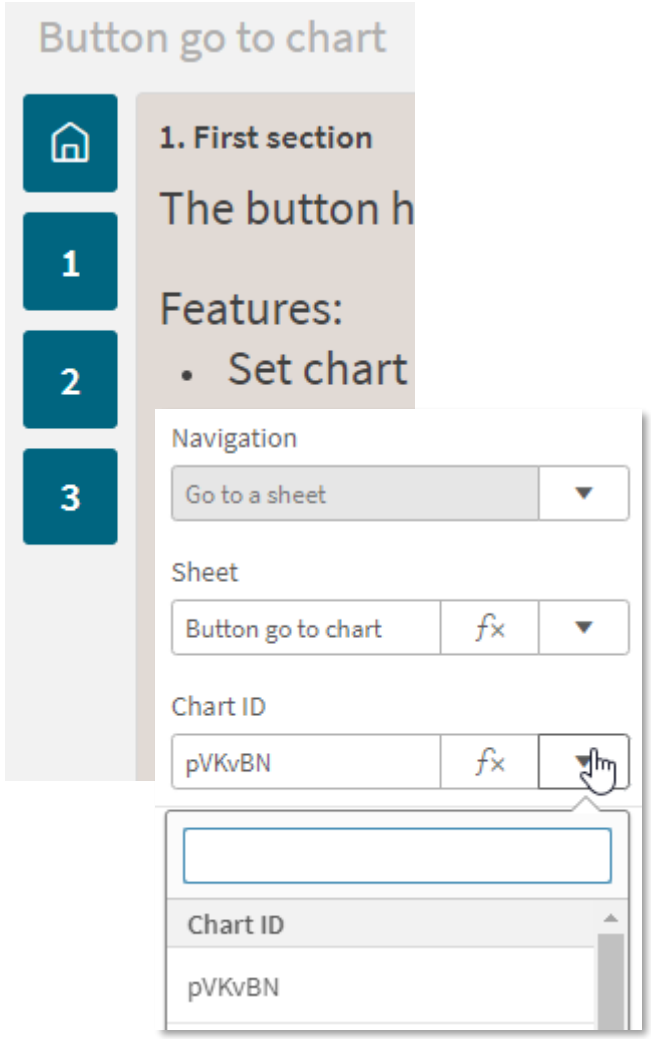
Jump to specific chart

Useful for

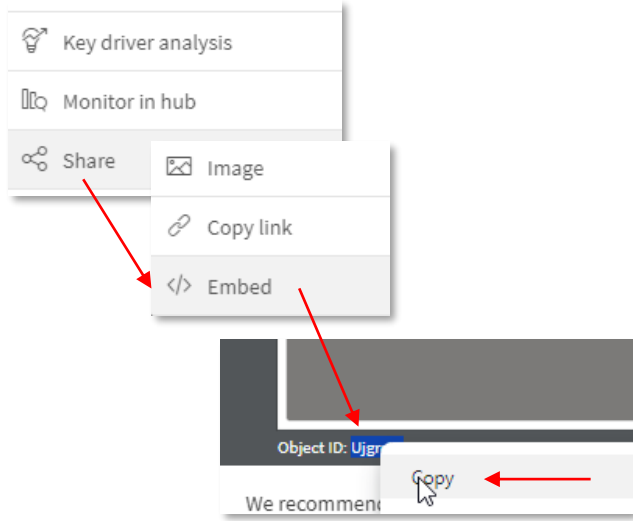
- Navigating to a specific chart
- Single page design
- Jump to section
- Back to top

Features

- Chart in addition to ”Go to sheet”
- Specify chart id
- Tip, to find id: do “Share > Embed”



Find id:



Color opacity

Easy adjust transparency with slider

Useful for

- Let the sheet background come through
- Make stacked charts more elegant

Features

- Set opacity with slider or enter digits
- Paste hex code with or without #

Table improvements

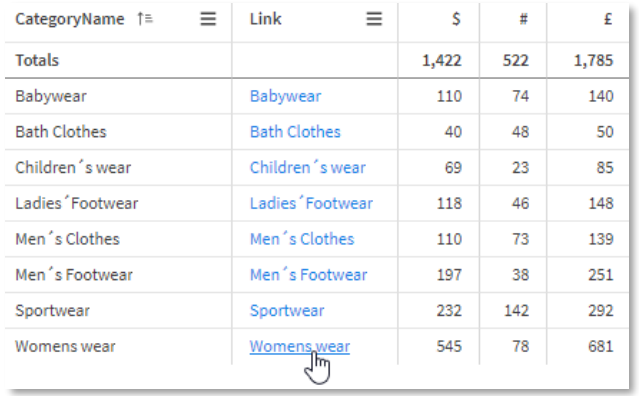
New straight table and pivot table improvements

Straight table

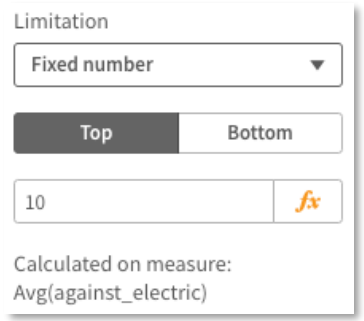
- Smaller columns
- URL links

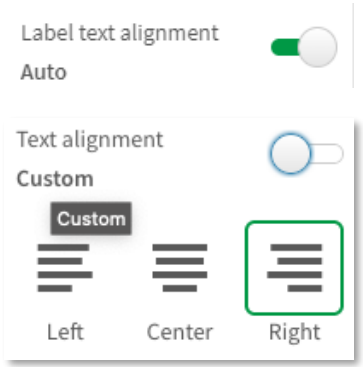
Pivot

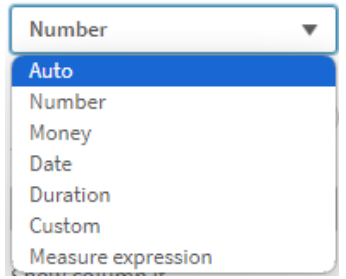
- Dimension limits
- Measure formatting
- Text alignment, dimension and measures values and titles
- URL links

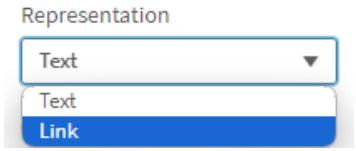


CategoryName	Link	$	#	£
Totals		1,422	522	1,785
Babywear	Babywear	110	74	140
Bath Clothes	Bath Clothes	40	48	50
Children´s wear	Children´s wear	69	23	85
Ladies´Footwear	Ladies´Footwear	118	46	148
Men´s Clothes	Men´s Clothes	110	73	139
Men´s Footwear	Men´s Footwear	197	38	251
Sportwear	Sportwear	232	142	292
Womens wear	Womens wear	545	78	681









Minor improvements

Small but valuable enhancements

- Sheet forward and back icons in toolbar if sheet header is hidden.
- Expressions evaluate before action option in Button
- Drag and drop charts into layout container
