

AI DATA CLOUD

Cortex AI & Snowflake ML

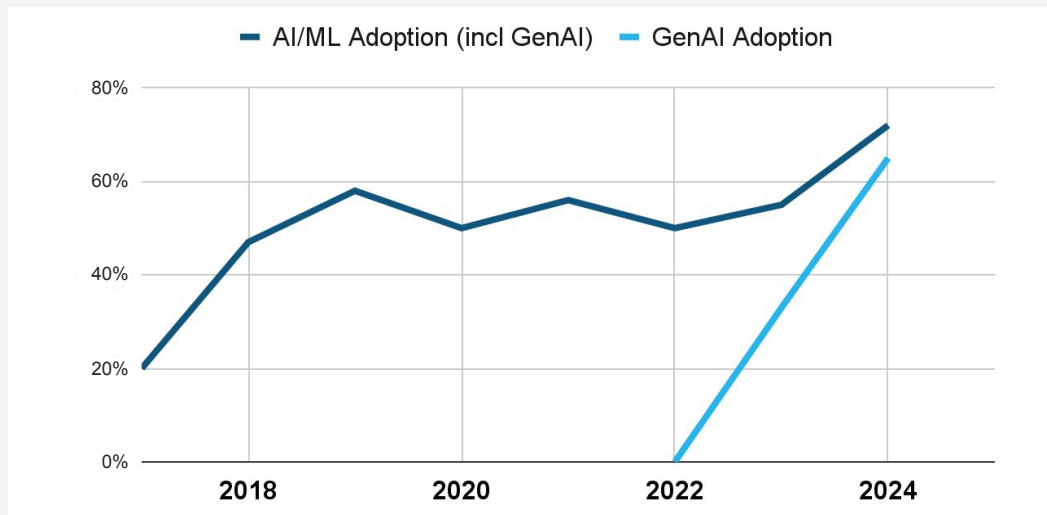

Easy. Efficient. Trusted.

2024

Enterprises Are Adopting Gen AI Fast

Predictive ML Still Important

Organizations Who Have Adopted AI/ML in 1 Business Function

Less than 2 years to achieve 65% adoption vs 10 years for ML

Enterprises adding significant and growing number of gen AI projects in addition to predictive ML

Industry Challenge: Getting Gen AI Apps into Production

Most LLM apps are not yet in production

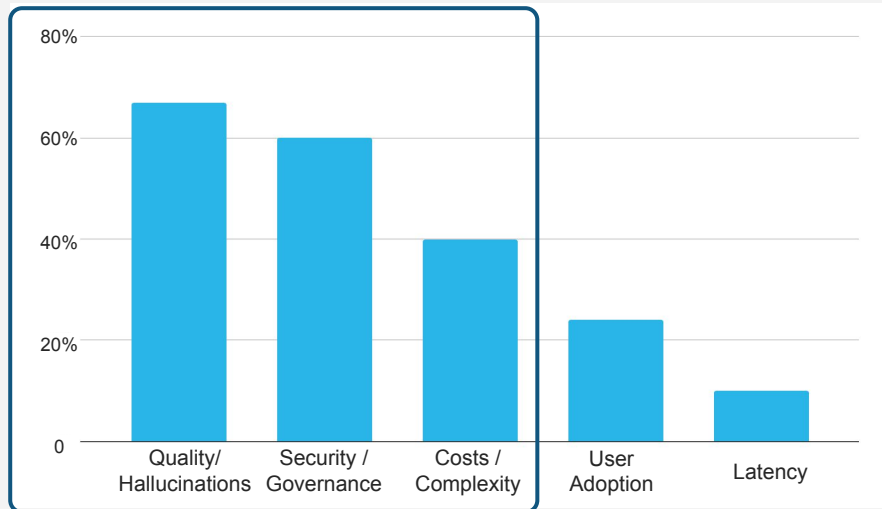

% of an Organization's LLM Apps in Production Today

Source: Industry Survey Results, Jan 2024

Quality, governance, and cost issues are top challenges.

Responses to Question - What are your top challenges in getting LLM apps to production?

Source: Industry Survey Results, Jan 2024

**THERE IS NO AI STRATEGY,
WITHOUT A DATA STRATEGY**

Snowflake AI Data Cloud

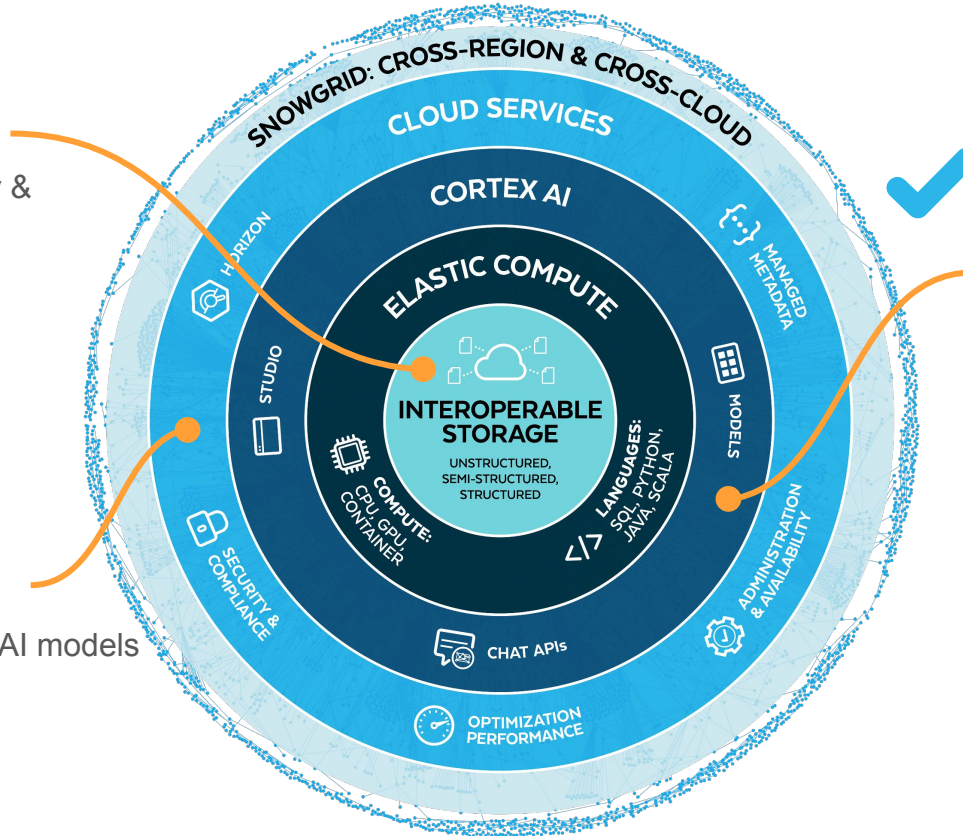

SOLID DATA FOUNDATION

Helps improve quality & reduce hallucinations

BUILT-IN GOVERNANCE

Secures both data & AI models

BRING AI TO YOUR DATA

Reduce complexity and optimize across quality and cost

Why Snowflake for AI/ML

End-to-End Platform for AI/ML Built to Address Industry Gen AI Challenges

APP DEVELOPMENT

Studio | Notebooks | Streamlit | Copilot

GENERATIVE AI
Cortex AI

MACHINE LEARNING
Snowflake ML

DATA & MODEL GOVERNANCE

Snowflake Horizon | Model Registry

EASY

Fully managed and tightly integrated data and AI infrastructure. Accessible via no-code Studio, SQL, Python, and REST APIs interfaces **to reduce development costs and complexity**

EFFICIENT

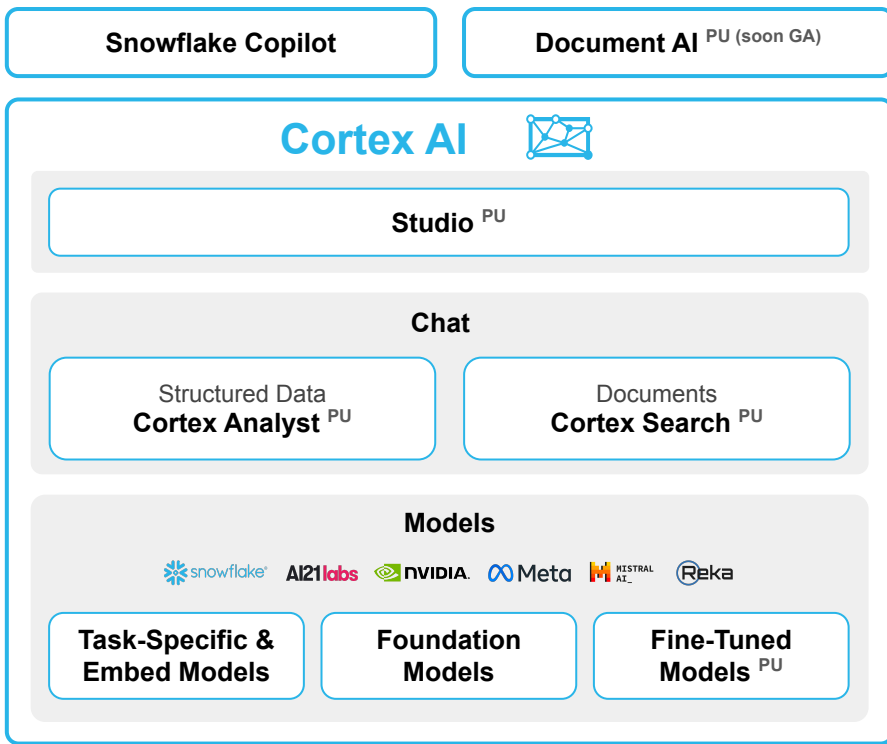

Streamline development-to-deployment lifecycle with cutting-edge AI models, frameworks, and apps running next to the data **to achieve better quality and operational cost**

TRUSTED

Protect the value of your IP at scale with **industry-leading security and unified governance for data and models** trusted by thousands of organizations

Cortex AI: Making Gen AI Easy, Efficient, and Trusted

POWERFUL AI APPS

No-code, powerful AI apps for code assistance, document understanding, and chatbots .

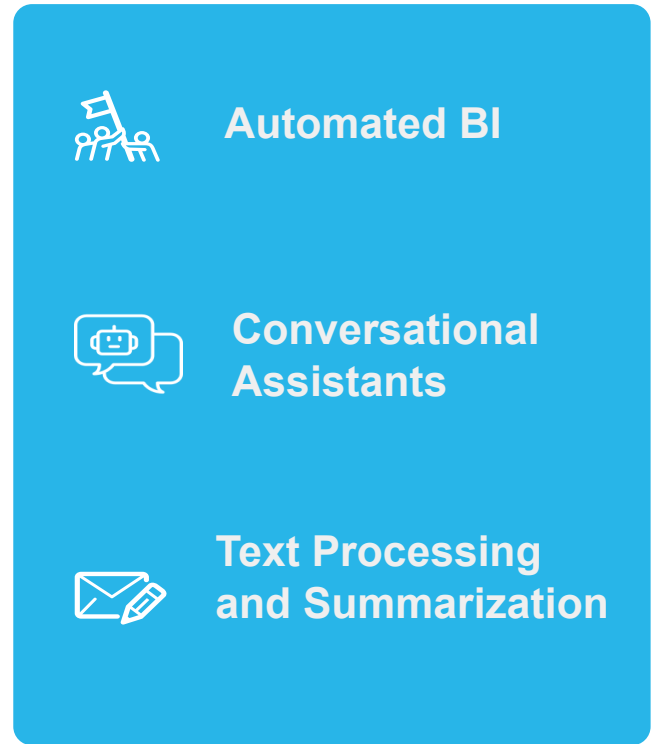

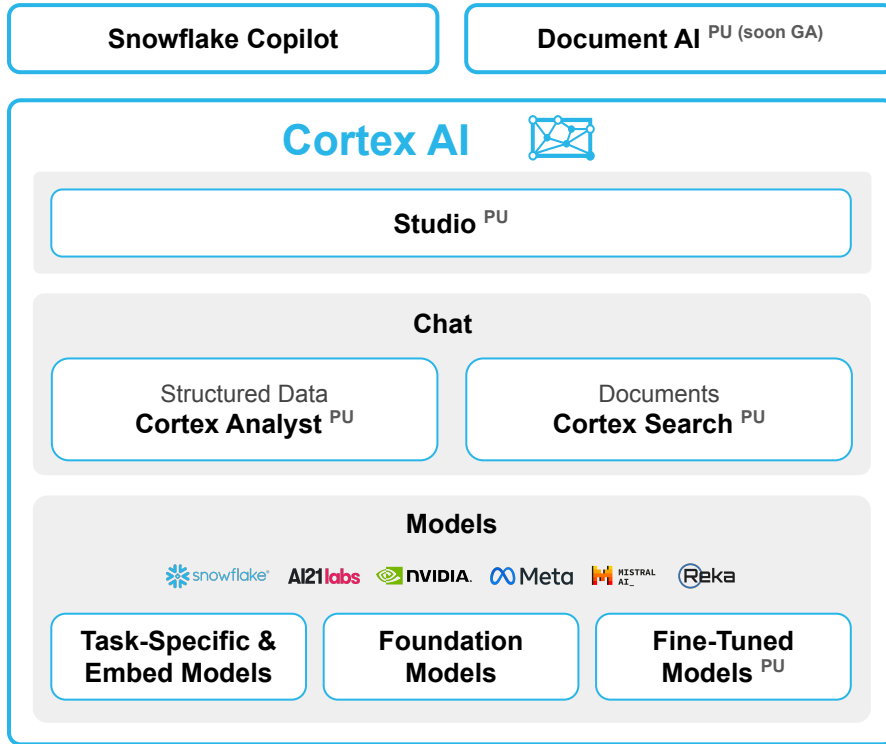

TALK TO YOUR DATA

State of the art Search and Text2SQL capabilities to build BI and AI chatbots easily.

MODELS

Top tier models, easily accessible, fully managed, tightly integrated, all inside of Snowflake.

Cortex AI Enables Your Gen AI Apps

What Are Your Top Gen AI Use Cases?

Automated BI

Business analysis with natural language

Code evaluation and generation

Conversational Assistants

Customer support assistants

Internal chat assistant

Knowledge management

Text Processing and Summarization

Document classification

Entity extraction

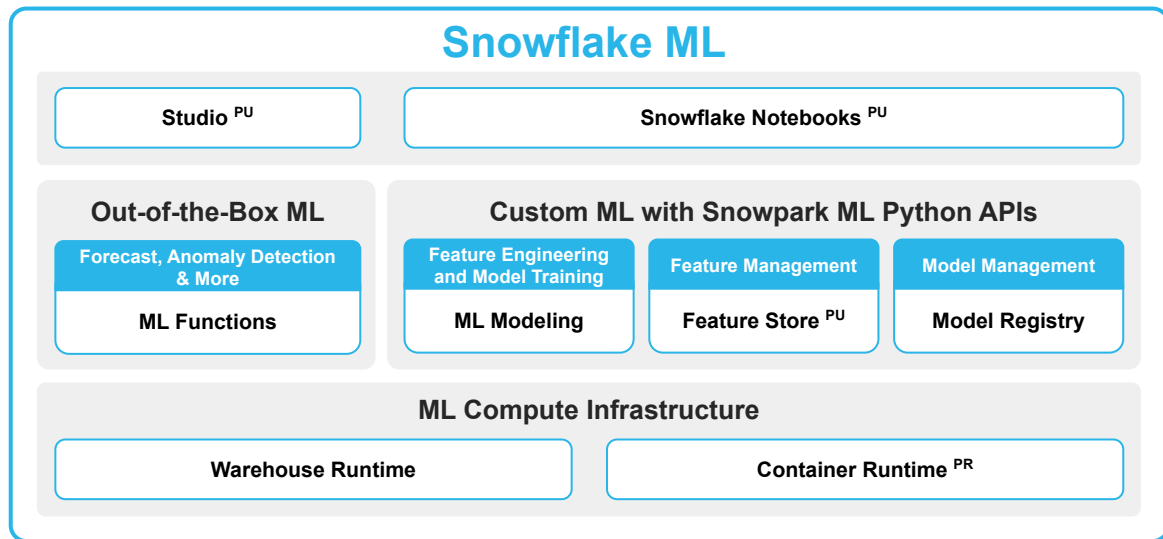

Notes summarization

Snowflake ML

Why Snowflake ML: Bring Your ML to Your Data

Integrated set of capabilities for end-to-end ML workflows in Snowflake

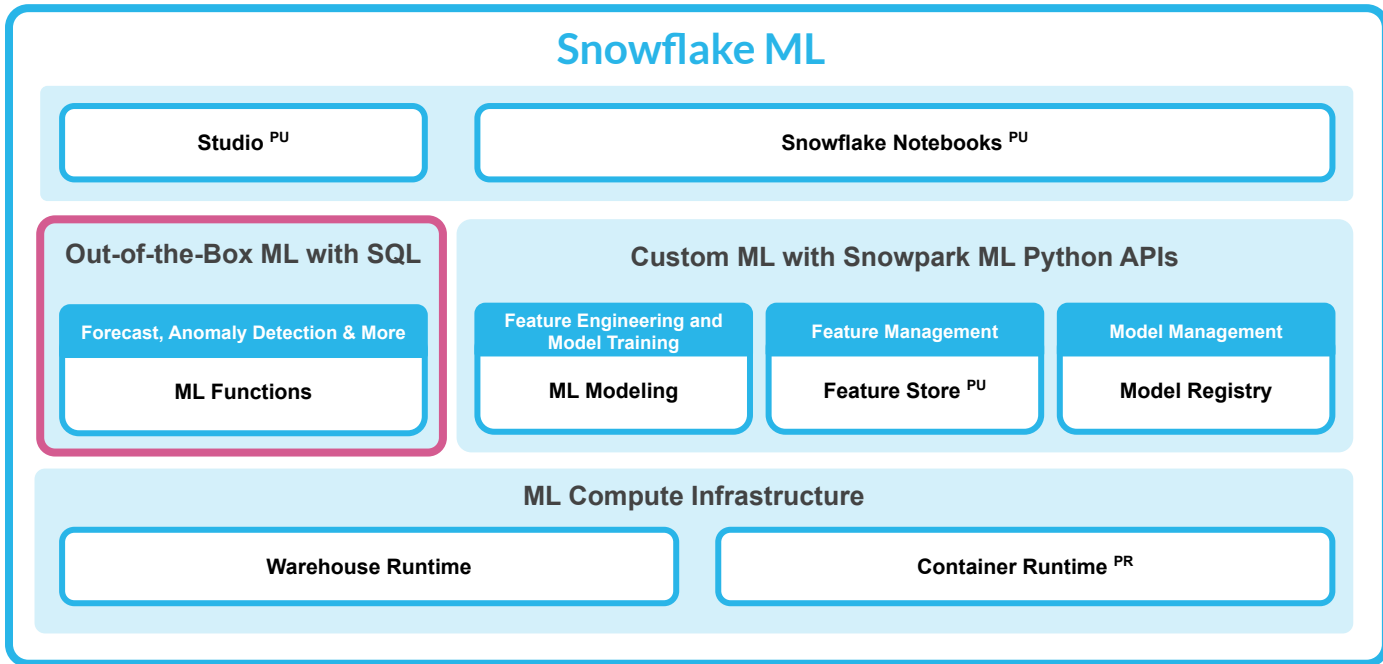

- No data movement
- ML operations made easy
- End-to-end governance

Snowflake ML

Integrated set of capabilities for end-to-end ML workflows in Snowflake

Snowflake ML Functions

WHAT IS IT

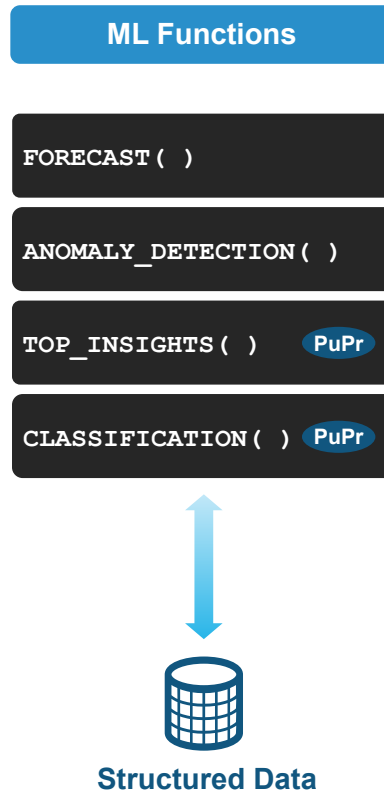

SQL functions that perform predictive analytics using machine learning under the hood

WHY USE IT

Generate predictions and insights on your structured data with the power of ML—but without its complexity

HOW TO USE IT

Use SQL function in Snowsight or expose as a custom app via Streamlit

Snowflake ML Functions

SQL functions that perform predictive analytics using ML under the hood

Forecasting

Build more reliable time series forecasts with automated handling of seasonality, missing values and more

GA

Anomaly Detection

Identify outliers and trigger alerts or help find unlikely-to-happen-again situations that should be excluded from analysis

GA

Top Insights

Quickly identify drivers contributing to the change of a given metric across user defined time intervals

PUBLIC PREVIEW

Classification

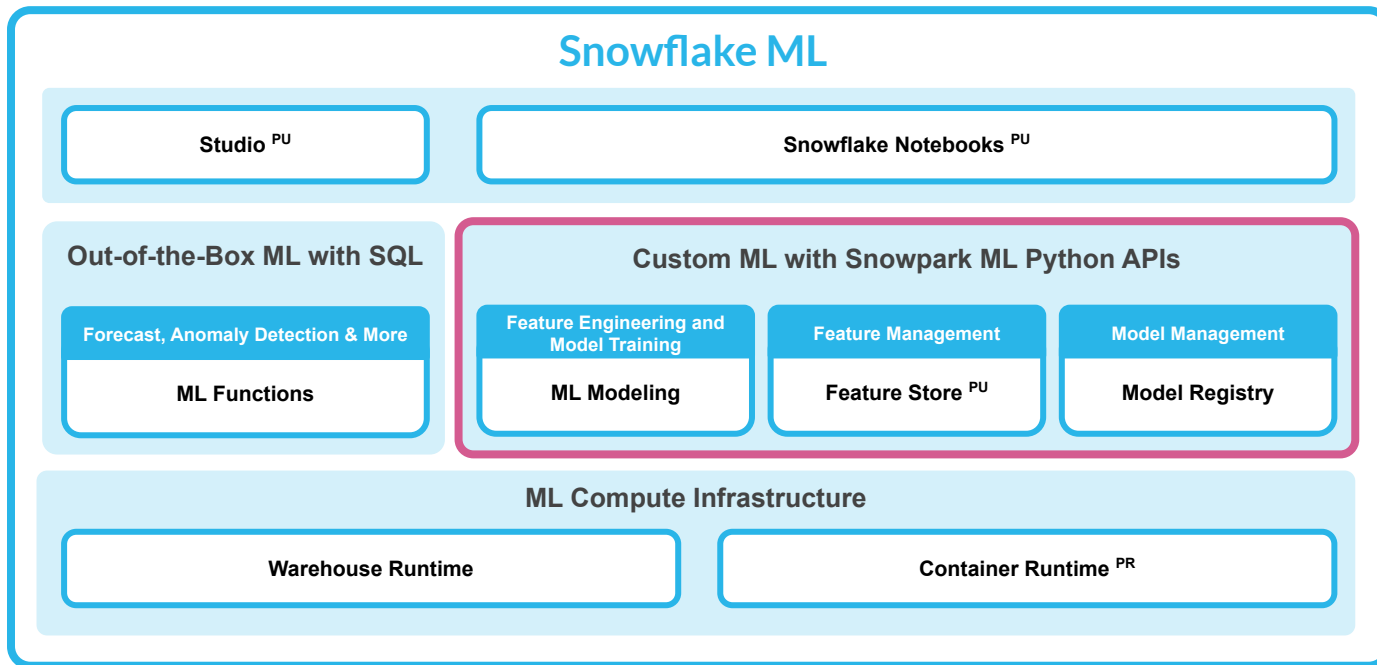

Sort data into different classes (e.g., loyal customer vs. likely to churn) using supervised learning techniques

PUBLIC PREVIEW

Snowflake ML

Integrated set of capabilities for end-to-end ML workflows in Snowflake

Snowflake Notebooks

WHAT IS IT

A familiar, easy-to-use notebook interface for your data work that seamlessly blends Python, SQL, and Markdown as well as integrations with key Snowflake offerings like Snowpark ML, Streamlit, Cortex and Iceberg

WHY USE IT

Simplify the process of connecting to your data and to amplify your data engineering, analytics, and machine learning workflows

HOW TO USE IT

- Create a notebook directly in Snowsight or from an existing project
- Sync with remote Git repo for version control and collaboration
- Schedule notebooks to run automated pipelines

The screenshot shows the Snowflake Notebooks interface with the following content:

Python as cell3

```

1 # Import Python packages used in this notebook
2 import streamlit as st
3 import altair as alt
4
5 # Pre-installed libraries that comes with the notebook
6 import pandas as pd
7 import numpy as np
8
9 # Package that we just added
10 import matplotlib.pyplot as plt
  
```

Markdown as cell4

SQL Querying at your fingertips

We can easily switch between Python and SQL in the same worksheet.

Let's write some SQL to generate sample data to play with.

SQL as cell5

```

1 -- Generating a synthetic dataset of Snowboard products, along with their price and rating
2 SELECT CONCAT('SNOW-', UNIFORM(1000, 9999, RANDOM())) AS PRODUCT_ID,
3 ABS(NORMAL(0, 5, RANDOM())) AS RATING,
4 ABS(NORMAL(1750, 200, FLOAT, RANDOM())) AS PRICE
5 FROM TABLE(GENERATOR(ROWCOUNT => 100));
  
```

PRODUCT_ID	RATING	PRICE
0 SNOW-9681	2.2102	879.2882
1 SNOW-9657	3.2823	835.3502
2 SNOW-3551	3.511	864.5094
3 SNOW-8226	0.9605	673.7927
4 SNOW-8473	3.1038	496.0473

What Are Your Top Predictive ML Use Cases?

Sales & Marketing

Propensity modeling

Lead scoring

Churn prediction

Security, Risk & Compliance

Fraud detection

Threat assessment

Verification

Forecasting, Pricing & Ads

Product demand

Price Optimization

Ad optimization

Supply Chain & Manufacturing

Supply chain planning

Anomaly detection

Predictive maintenance
